

How to find Pictures on the Internet

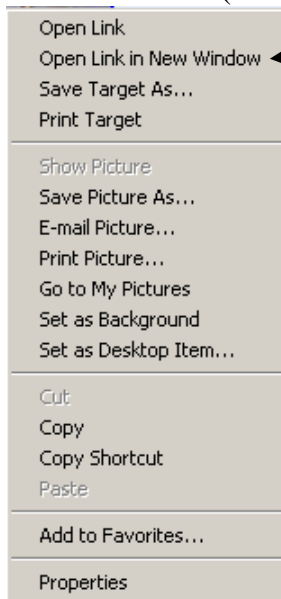

1. Start Internet Explorer the blue  on the task bar next to the Start menu.
2. In the address bar type `www.google.com` and press the enter button.
3. Click on Images

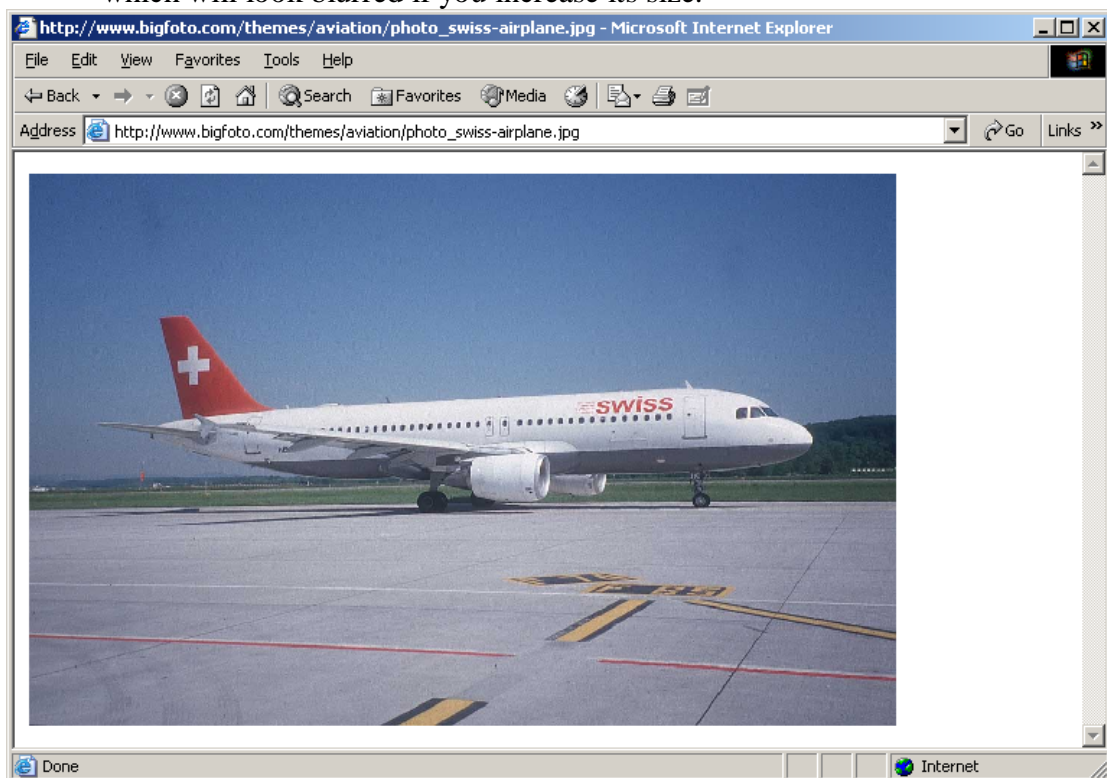

4. Type in a term to search for such as airplane and click on Google Search. You may get something like this.

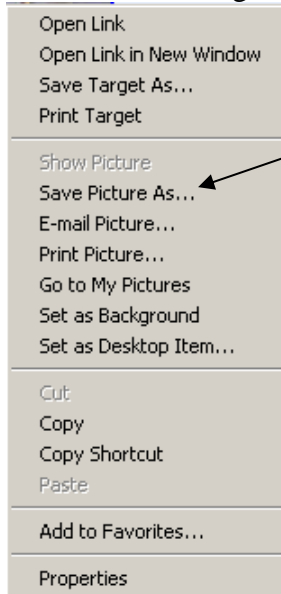

5. Select the picture you want to see and **right** click. Select Open link in New Window (this preserves your search so that you can go back to it later).

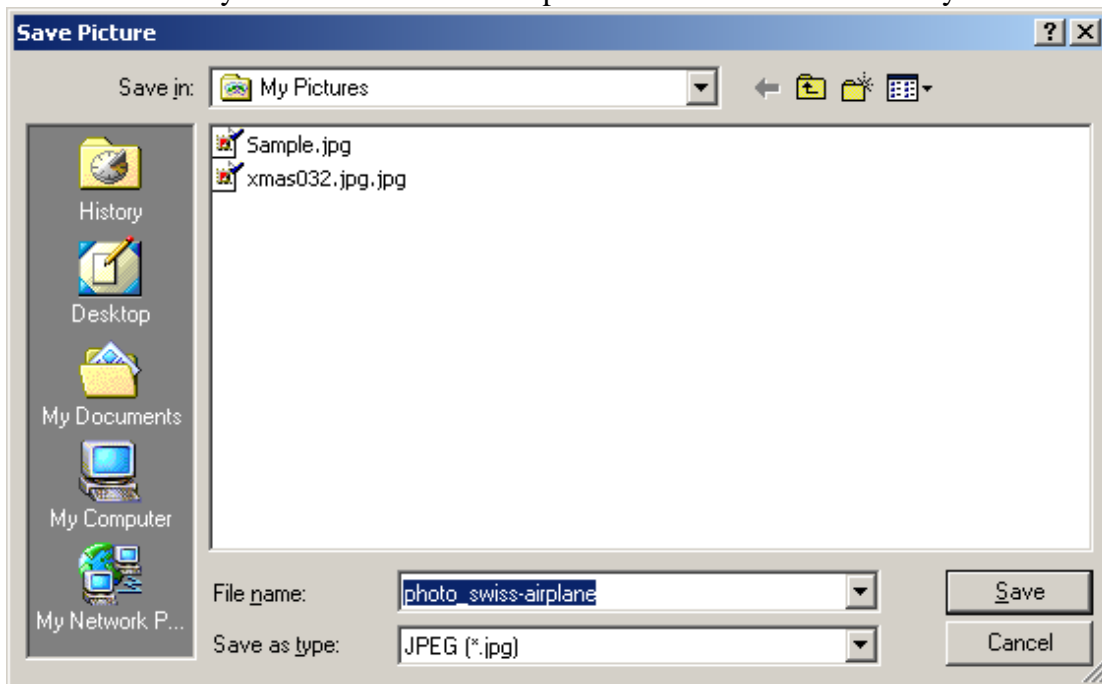

6. Select see full size image. Note: it is important to save the full size image since the thumbnail will be a low resolution (low sharpness) miniature picture which will look blurred if you increase its size.

7. If this image is one you want. Right click and select Save Picture As

8. A dialog box similar to the one below will appear. My Pictures is a sub folder within My Documents. In the computer suites it will be saved on your number.

9. This picture can be put into PowerPoint (or Word) by Insert Picture, From File.
